

FIELD

CRYPTOKINESIOLOGY

To keep their hand-eye coordination sharp, many professional athletes take to other visually intense activities, such as solving the daily crossword and cycling around. When players complain that their performance is suffering due to possible *iadyslex* or similar *adiesmal*, NPLabs stands ready to administer the test presented here, to help determine the cause of any problems and get them back in the game.

ACROSS

- 1 Sit like a bird
- 6 Ceremony
