

**BREAK-
THROUGH
RESEARCH!**

DISCIPLINE

SOCIAL SCIENCE

Use what you've discovered in the Social Sciences to complete this research. When you have the name of the relic, bring it to the administrators to retrieve from our vast archives.

TOPIC: EXCAVATION OF THE SITE OFF COAST OF LITochoro, GREECE

Notes from our people in the field: "The fragments we've been retrieving are in pretty bad condition, but perhaps something can still be made of them. Several images could be made from the symbols on the fragments of pottery we're bringing up, but if we can figure out where to search next, then one final single image can be reconstructed and we'll have our relic."
