

# ASGARD SOL. - VERBAL DESCRIPTION

Each illustration is a "Wacky Wordy" type rebus puzzle, where the typography or manipulation of words suggests a well-known phrase. In this case, where "nothing is as it should be", a significant word has been replaced in the original phrase. The images are arranged alphabetically by the new word.

In each case, the old and new word are two parts of a triad. Solvers should note the third word for each. Each of the original, unaltered phrases is referenced by a fragment of Bifrost. The color of each fragment in spectrum order (Red = 1, Orange = 2, ... Violet = 7) gives an index into its associated third word.

In image order, the corrected phrases, swapped-in words, third words, fragments, and indexed letters are:
