

All of the entries found in the word search (as shown above) can be grouped into one of four treasure types. The left-hand numbers in each list give the enumeration for the group's members, in alphabetical order.

Superfluous letters in the grid spell "TITLE / SPORT / CITY / ARTIST". These specify an additional piece of information that must be provided for each list entry. The right-hand numbers in each list refer to letters to be taken from those additional pieces of information.

As shown at the left, those letters spell "The hiding place is STRONGBOX OF IVORY", which is the final answer.
