

# COOKIES

by Mark Halpin

In *Anyone Can Whistle*, it's difficult to tell who's sane and who's a cookie.

In this puzzle, answers to Across clues are to be entered normally in the grid. The wordplay in a number of irrational clues, however, yields an extra letter in addition to the answer word. Those extra letters, in clue order, spell out a clearly fallacious bit of logic, proof of a disordered mind.

Down clues are arranged alphabetically by their answers, which must be located in the grid. Sadly, a number of grid entries (though legitimate words or phrases) are affected by the illogical belief mentioned above. All of those answers should be confined, for their own good, in the Cookie Jar, the shaded central region of the grid.

Some of my favorite cookies may additionally be found traversing the completed puzzle.
